AB PVC resistant to discoloration, CO2H group formation, and loss of mol. weight and mech. properties contains (hydroxy)stearates or organic compds. of Sn, Sb or Pb, epoxides or P compds. containing secondary OH groups, and, optionally, polyethylene wax or glycerol esters of C12-18 acids and UV absorbers as stabilizers. A 100-μm sheet of PVC containing 3 phr mixture of 60% Ca stearate and 40% 1,4-pentanediol (I) was stable in outdoor exposure for 360 days; vs. 200 without II.

TT 9002-86-2, Poly(vinyl chloride)

RL: USES (Uses)

(stabilizers for weathering-resistant)

IT 57-55-6, 1,2-Propanediol, uses and miscellaneous

RL: USES (Uses)

(stabilizers, for weather-resistant PVC)
